ADDENDUM TO HISTOPATHOLOGY CASSETTE PRINTER SPECIFICATIONS

Item 8

PC and Software: An IBM compatible personal computer using Microsoft Windows as an operating system and the software to operate the cassette printer must be included and must be customizable. The included personal computer will be installed on a large network. The operating system installed on the personal computer must be one of the following: Microsoft Windows XP Prosfessional, Microsoft Windows 7 Prosfessional or Microsoft Windows 7 Ultimate. Additionally the software must allow operators to select which cassette magazine to print from for each cassette or serial group of cassettes and automatically advance to another cassette magazine containing the same type/color of cassettes when necessary. The software must also be able to operate a Thermo Scientific Slidemate slide printer that will also be installed on the network and allow data to be sent to this slide printer via an Ethernet connection.

The included personal computer will be installed on a large network. The operating system installed on the personal computer must be one of the following: Microsoft Windows XP Prosfessional, Microsoft Windows 7 Prosfessional or Microsoft Windows 7 Ultimate.

A Thermo Scientific Slidemate slide printer will also be installed on the network and the software must also be able to operate this slide printer and allow data to be sent to this slide printer via an Ethernet connection.
